

ADVANCE WORKSHOP ANNOUNCEMENT

TO: Interested Parties
FROM: Cramer Fish Sciences
DATE: May 8, 2007

Klamath Coho Integrated Modeling Framework

When: June 8, 2007

Where: Medford, OR

Purpose of Workshop: Coho Model Development Workshop

Workshop Location: To be determined

Starting Time: To be determined

Dear Interested Parties,

Cramer Fish Sciences announces a workshop in Medford, OR on June 8, 2007 to discuss development of the Klamath Coho Integrated Modeling Framework, a coho life cycle model for the Klamath River and its tributaries. Details regarding the starting time and location will be sent as soon as they are finalized. Please mark your calendars and RSVP to Cramer Fish Sciences (contact info below).

A series of eight technical memorandums has been developed to describe various aspects of a coho life-cycle model for the Klamath Basin. All Technical Memorandums have been released for your review. The model will be used to develop the Biological Assessment for the Bureau of Reclamation during reconsultation with NOAA Fisheries. The June 8 workshop will provide additional opportunities to comment and discuss Technical Memorandums 5 through 8. A workshop was held in January 2007 that discussed memorandums 1 through 4. All of the materials developed for the Klamath Coho Integrated Modeling Framework are available at the project website (<<http://www.fishsciences.net/projects/klamathcoho/index.php>>).
